

**Compilation:** A compilation work is a collection of two or more separate works in a single distribution package, such as a DVD or a Blu-ray containing a feature film along with various bonus features, a theatrical feature with a trailer for another feature attached at its head, a home video boxed set of all episodes from a season of a series, etc.

- **CASE 1:** You need to put on one DVD (Blu-ray or else) 3 movies OR 1 movie + 1 extra + 1 interview - Make sure that each content has already an ISAN. If not, please refer to **ISAN DEMO: 1 – ISAN CREATION**

Use the *xxx.update* user to log onto the system

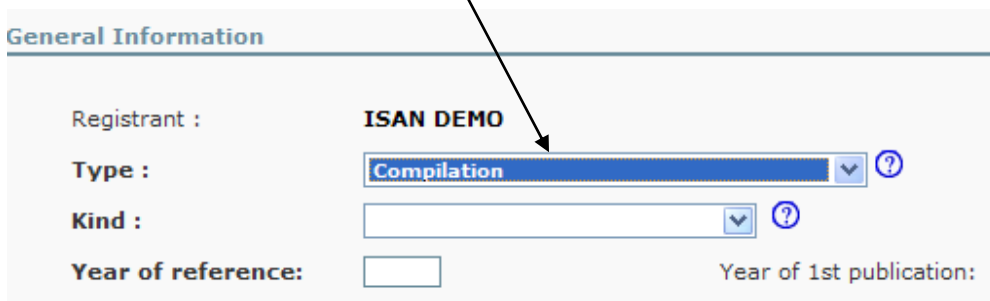

The screenshot shows the ISAN System login interface. At the top left is the ISAN logo. The main heading is "Welcome to the ISAN System". Below this, it says "Please login :". There are two input fields: "Username :" with the value "ISANdemo.update" and "Password :" with "\*\*\*\*\*". A red "Login" button is positioned below the password field. To the right of the login fields are links for "lost password ?" and "lost username ?". At the bottom of the login section is a link that says "Register yourself as a new client".

The process is similar to the ISAN creation process. Follow the instructions of **ISAN DEMO: 1 – ISAN CREATION**.

**Work type: select "Compilation"**

The screenshot shows the "General Information" section of the ISAN creation form. The "Registrant :" field is set to "ISAN DEMO". The "Type :" dropdown menu is set to "Compilation". The "Kind :" dropdown menu is empty. The "Year of reference:" and "Year of 1st publication:" fields are empty. There are question mark icons next to the "Type" and "Kind" dropdowns. An arrow points from the text "Work type: select 'Compilation'" to the "Type" dropdown menu.

On the last page (4 – Composite), enter the ISAN of all works included in the compilation.

*You may get lots of pending registrations because they are very similar to each other. Resolve the pending ISANs by clicking “is new”. – Please refer to **ISAN DEMO: 4 – PENDING RESOLUTION***

**RECOMMENDATION:** Register the compilations under the serial header, as episodes, to keep the relationship between the series (with the 26 episodes) and the ISANs obtained for the compilations / the V-ISANs obtained for the discs.
